

**Alfredo Granados García** serves as the Secretary General of EurCOLD. He graduated with a MSc degree in Civil Engineering from the Technical University of Madrid in 2001 and obtained his PhD from the same institution in 2013. Since then, he has worked as a consulting engineer for INPROES, a firm specializing in dam and hydraulic engineering. In this role, he has been involved in the design and construction of 25 new dams, as well as in the heightening, rehabilitation, and safety assessment of various dams.

In 2009, he joined the Technical University of Madrid as a Teaching Assistant, and he is currently an Associate Professor of Water Resources and Hydraulic Engineering. His research interests focus on the impact of climate change on the performance and safety of hydraulic infrastructure, as well as on dam safety assessment and rehabilitation.

He is an active member of the Spanish National Committee on Large Dams and the Spanish Commission for Large Dams Standards.
