

Sera Lazaridou is a Civil Engineer with more than 20 years professional experience. She graduated from the National Technical University of Athens, specializing in Hydraulic works and Water Resources Management. She also holds an MSc in Soil Mechanics and Environmental Geotechnics from Imperial College in London, U.K.

She serves as a Senior Partner of Hydroexigiantiki Consulting Engineers focusing on water resources management and the design of water works, especially multipurpose dams for water supply, irrigation, flood defense, hydropower, and small hydropower projects. She has participated in the construction and first filling of major dam projects and has extensive experience in issues related to dam sustainability and safety, including inspections and reviews, for numerous large dams.

She is member of the ICOLD Technical Committee H on Dam Safety, representing Greece, and she is co-chairing an Ad Hoc Group in EurCOLD on Public Awareness Strategies.

She is currently the President of the ICOLD European Club (EurCOLD) for the 2023-2025 term, the Secretary General of the Greek Committee on Large Dams (GCOLD) and has been a member of GCOLD since 2012 (including a term as Vice President). She also serves on the Governing Board of ETIP Hydropower for the 2023-2026 term and has been a member (sub.) of the Greek Dam Administrative Authority since 2019.
